## Experience

### Sr. Product Designer

Dave

01.2019 - Present

Lead Product Designer for the internal Customer Support (CS) Dashboard. I advise the Product Managers, solve the CS team's pain points, design new features, enhanced existing features. I focus on designing accessible and user-friendly interfaces to support the team.

### Lead Designer & Product Manager

Ubermedia

07.2017 - Present

Lead Product Management and UX design on a new tool call Vista Measurement. Responsible for design research, understanding user needs, define the roadmap, designing the MVP, and future features. After completing designs, I continued as Product Manager and as well as UI developer. Managed Engineers and worked with stakeholders.

### Co-Founder & All Things Design

Cintric

01.2015 - 07.2017

Co-founder Cintric and was the sole designer. I also wore a lot of other hats. I was responsible for designing and building Cintric's products. I was also responsible for all user-facing and investor materials, including pitch decks, and websites. Beyond design, I also worked on the front-end of Cintric's web-based products, CSS framework, and websites. In 2017, Cintric was aquired by UberMedia.

### Sr. Product Designer

CompuCom Systems

02.2013 - 02.2015

I was the Product Designer of the Internal Product Development team. We used the agile design process to discover, design, develop, deliver TrackIT, an internal tool for managing projects for team leaders and their team members. I was in charge of visual design, UX/UI design, and front-end implementation of designs.
